

PECB Certified Lead Privacy Implementer

Master the implementation and management of a Privacy Framework based on ISO/IEC 29100

Why should you attend?

Lead Privacy Implementer training enables you to develop the necessary expertise to support an organization in designing, implementing, operating and maintaining Information and Communication Technology (ICT) systems that handle and protect Personally Identifiable Information (PII). During this training course, you will also have the opportunity to support an organization in improving privacy programs through the use of best practices and spur innovative solutions that enable the protection of PII within ICT systems.

After mastering all the necessary concepts of ISO/IEC 29100, you can sit for the exam and apply for a “PECB Certified Lead Privacy Implementer” certificate. By holding a PECB Lead Privacy Implementer Certificate, you will demonstrate that you have the practical knowledge and professional capabilities to implement and manage a privacy framework within an organization.

Who should attend?

- Managers or consultants involved and concerned with privacy security
- Privacy security managers responsible for defining the privacy safeguarding requirements related to PII within an ICT environment
- Members of an Information and Communication Technology (ICT) system
- Data protection and privacy officers
